

Jennifer Lakey

B.S. in Computer Science concentration Project Management for STEM

Southern New Hampshire University (GPA: 3.989)

Technical Project Manager • Software Engineering Background

Kansas City, MO

Professional Summary

I am a technical project manager with a software engineering foundation who excels at leading cross-functional teams, translating complex requirements into actionable plans, and delivering high-quality technical solutions. I bring a structured, strategic approach to planning, communication, and delivery, ensuring alignment across engineering, product, and organizational stakeholders. I combine strong systems thinking with hands-on engineering experience, enabling structured execution and clarity in complex technical environments. I learn quickly, synthesize complex information efficiently, and adapt rapidly, allowing me to support teams, optimize processes, and drive successful outcomes through clarity, empathy, collaboration, and technical depth. I am committed to creating environments where teams can excel and technical initiatives can succeed.

Experience

Technical Project Manager (Capstone Project)

Southern New Hampshire University • 2026

- Led a full end-to-end software development project, defining scope, requirements, risks, and delivery milestones.
- Created structured project plans, timelines, and progress checkpoints to manage execution and maintain visibility.
- Coordinated technical decisions, documented system behavior, and ensured alignment between requirements and implementation.
- Applied Agile and hybrid methodologies to manage iterative development and adapt to evolving constraints.
- Delivered a functional software solution supported by clear documentation, testing, and stakeholder communication.

Assistant Store Manager

Dollar Tree • 2018–2020

- Led daily operations and coordinated team workflows in a fast-paced retail environment.
- Trained and supervised employees, improving team performance, communication, and task ownership.
- Managed inventory, scheduling, and customer service priorities using structured planning and problem-solving.
- Resolved operational issues quickly, maintaining store efficiency and customer satisfaction.
- Supported organizational changes and new processes with clear communication and team guidance.

Fulfillment Associate

Amazon • 2021–2022

Skills

Project Management & Delivery

- Agile and hybrid delivery
- Strategic planning and technical scoping
- Risk management and performance measurement
- Stakeholder communication and influence
- Systems thinking and process optimization
- Change management and organizational readiness

Software Engineering & Architecture

- Software development and SDLC
- Cloud fundamentals (AWS, Azure, GCP)
- DevOps and automation (CI/CD, IaC, Docker, Kubernetes)
- API design (REST, GraphQL)
- Architecture patterns (MVC, DDD, event-driven)
- Secure coding and quality engineering
- Data engineering (ETL, SQL/NoSQL)
- AI/ML fundamentals

Leadership & Collaboration

- Team leadership and development
- Cross-functional collaboration
- Strategic and transformational leadership
- Communication and executive presence
- Decision-making under uncertainty
- Ethical leadership and psychological safety

Cognitive & Analytical Strengths

- Rapid learning and adaptation
- High information absorption and retention
- Complex systems synthesis
- Pattern recognition
- Documentation mastery
- Research efficiency

- Worked in a high-volume logistics environment requiring precision, speed, and adaptability.
- Followed structured workflows and quality standards to ensure accurate order fulfillment.
- Collaborated with team members to meet daily performance targets and resolve workflow bottlenecks.
- Adapted quickly to new tools, processes, and operational changes.

Projects

CS-499 Capstone Project – Technical Project Manager & Developer

Southern New Hampshire University • 2026

- Selected and enhanced multiple software artifacts to demonstrate proficiency in software engineering, algorithms, and project management.
- Designed and implemented technical improvements, including architectural refinements, code enhancements, and documentation upgrades.
- Built a multi-page GitHub Pages portfolio showcasing project planning, risk analysis, stakeholder communication, and delivery strategy.
- Demonstrated combined PM and engineering capabilities through structured planning, iterative development, and end-to-end project execution.

Computational Graphics & Visualization Project – Technical Project Manager & Developer

OpenGL • C++ • 2025

- Designed and built a navigational 3D scene based on a chosen reference image using OpenGL and C++.
- Implemented custom geometric meshes, vertex arrays, index buffers, transformations, lighting, and texture mapping.
- Developed interactive camera controls and scene navigation to create a functional, immersive environment.
- Selected as a core artifact for the CS-499 capstone due to its complexity and originality.

Fictional Sanford B. Ladd School Redevelopment Project – Project Manager

SNHU • 2026

- Created a fully scoped fictional project from concept to execution, including research, feasibility analysis, and stakeholder identification.
- Developed comprehensive PM artifacts: project charter, scope statement, WBS, schedule, risk register, communication plan, and budget.
- Demonstrated structured planning, documentation mastery, and realistic project modeling aligned with PMBOK principles.

GitHub Pages Portfolio – Developer & Technical Project Manager

HTML • CSS • GitHub Pages • 2026

- Built and expanded a multi-page professional portfolio showcasing technical PM artifacts, software engineering projects, and documentation.
- Designed structured content layouts, navigation, and project pages to highlight planning, delivery, and technical depth.
- Integrated capstone enhancements, coursework projects, and personal development work into a cohesive professional brand.

Education

Bachelor of Science, Computer Science (Project Management for STEM)

Southern New Hampshire University • 2023–2026

Graduation pending final processing (July/August 2026); coursework completed June 2026.

Coursework in Creative Writing for Entertainment

Full Sail University • 2011–2013

Focused on narrative design, structured writing, and communication.

Coursework in Studio Art

Central Missouri State University • 2004–2005

Developed visual communication, design thinking, and creative problem-solving.

High School Diploma

Warrensburg High School • 2004
